## What should you know prior to implement O&M digitization

- Introduction
- How digitization improves the O&M process?
- Skills and Infrastructure
- Digital Transformation Strategy

# Introduction

To remain competitive, Service managers need to know how digitization will affect and improve O&M process to identify trends and patterns of asset behavior.

In the past, the main objective of the O&M department was to carry out repairs when the asset was not in operation. Today, O&M influences all aspects, efficiency, risk, safety, environment, energy, costs, quality and customer satisfaction.

Adequate O&M digitized management, taking into account the life cycle of each physical asset in all its phases:

- Work identification phase
- Planning phase
- Scheduling phase
- Work execution phase
- Work completion phase
- Analysis phase

## How digitization improves the O&M process?

The O&M team generate a large amount of information that exceed the capacity of human analysis. This is why it is necessary to combine technical and financial indicators with the use of available digitization technology that present and help to:

- **Control of delays**
- **Troubleshooting efficiently**
- **Predictive maintenance**
- **Reduction of energy consumption**
- **Remote work**
- **Digital Inventory**
- **Human resources**
- **Facilitate integration**
- **Communication and mobility**

# Skills and Infrastructure

- **Confident visible leadership**

- QRS

# Highly Recommended Criteria's, Merits and KPIs

## Beyond Traditional KPI:

- Max, Min and average DT
- PM performance meter
- MEL, Man power load
- MTBF, MTTR
- Maintenance – V – Equipment cost

## Beyond Traditional Benchmarking:

- Black, Whit OR Grey
- Repair, PM
- Employee
- Service Provider

## Beyond Traditional Quality Control:

- Manage QA Criteria
- User Errors
- Incidents Related to Equipment
- Misused, Missing
- DT- V – TP
- Due PM failure
- No. of failure per equipment

# Highly Recommended Criteria's, Merits and KPIs

## Beyond Traditional Operation:

- Operating Contracts, Contracts Budget
- Supply Chain, Inventory
- High Risk

## Beyond Traditional Priorities :

- Class, WOP
- Tolerance Period
- Risk Factor
- Power Load

## Beyond Traditional Cost Management:

- Asset cost, Depreciated Value
- Man Power
- Repair cost, PM cost
- Parts consumption
- Revenue growth

# Business Intelligent Dashboard

## Benefits

- Monitor multiple matrices at once.
- Easy accessibility to data.
- Easy to read,
- Valuable reports
- Better decision making
