Interoperability
The Pillar of
Smart Cities

    #OmaintecConf

An Initiative by

Organized by

FLASHNET

We develop innovative **technology**, create unique **products** and integrate open protocol systems for smart **street lighting** and smart **cities**.

Since 2022, Flashnet is part of Lucy Group

- Established in Oxford over **200 years** ago
- **Employ over 1,600 people** across 5 continents and 12 countries
- Advance the **transition to a carbon-free world**
- infrastructure that **enables renewable energy and smart cities**
- Long history in **street lighting controls and smart lighting**

Control

THE 21ST INTERNATIONAL OPERATIONS & MAINTENANCE CONFERENCE IN THE ARAB COUNTRIES

Avoid a **locked-in** city

Cities that deploy open standard systems will be able to use smart city solutions from multiple suppliers that “talk” to each other.

EV charging

Using the inteliLIGHT® remote management platform, Brasov is one of the first European cities to witness Electric Vehicle **charging directly from the street lighting grid.**

- able to charge **all current electric vehicles** and plug-in hybrids with power up to 22 kW
- outdoor use - proven fiberglass reinforced polyester (SMC-sheet molding compound) with **superior mechanical, chemical and electrical properties**
- **medium charging speed:** 2-3 hours
- **multiple payment options** (SMS, credit card, pre-paid etc.)

- Temperature
- Humidity
- Pollution
- Noise level
- Dust level

When people feel safe and the feeling of general well-being encourages tourists to come, businesses to thrive and the city will attract even more prosperity.

- **citywide** coverage: any hotspot in the city can be easily monitored
- **maximal resistivity** against dust, water, and mechanical damage
- **wide-angle** camera with night vision

integrated motion sensors in Bacau, Romania

The street lighting adapts to traffic conditions based on the input provided by the motion sensors.

- Motion sensors can be connected to controllers via “dry contact” input or via DALI2 digital input
- Advanced doppler radar motion sensor, effective even in tough weather conditions (rain, fog)

An Initiative by

Organized by

strong worldwide partnerships

Since 2005, more than **300 million people** have already witnessed the benefits of inteliLIGHT, in **hundreds of cities** on **5 continents**

Washington, D.C., USA

- › 75 000 streetlamps
- › NEMA controllers
- › NB-IoT, LTE-M communications
- › inteliLIGHT® Streetlight Control Software
- › Smart city integrations: Wi-Fi coverage

Brussels, Belgium

- › 85 000 streetlamps in the city
- › NEMA controllers
- › NB-IoT, Cellular communications
- › Third party software, integrated via TALQ2

Santiago, Chile

- › 70 000 streetlamps
- › Pole-mounted and NEMA controllers
- › LoRaWAN™ and Cellular communications
- › inteliLIGHT® Streetlight Control Software
- › Smart city integrations

Brescia, Italy

- › 44 000 streetlamps
- › Zhaga controllers
- › LoRaWAN™ public communication network
- › inteliLIGHT® Streetlight Control Software

Efficient street lighting & custom sensor integration in **Mecca**

In one of the first large scale smart street lighting deployments in the Middle East, Mecca chose inteliLIGHT® PLC street lighting management solution with customized features: cable cut detection, pole door opening and pole impact sensors.

Lighting efficiency and architectural value for **Dubai** **Water Canal**

Provide smart management capabilities, while maintaining the architectural integrity for the award-winning street lighting design project of Dubai's newest touristic and commercial attraction: install inteliLIGHT® embedded controllers inside the street lighting fixtures.

10 smart city services use Sigfox to communicate and integrate in **Abu Dhabi**

Aiming for true smart city synergies: street lighting control, seamlessly integrated in a project with 10 other city services like asset tracking, air quality monitoring, smart parking, water metering and even palm tree weevil detection, all using Sigfox communications.
